PRECISION **+** *Co2 REGULATOR*

Primary Precision + Co₂ Regulator

PRIMARY REGULATORS

Primary gas regulator drop the high pressure of gas cylinder to suitable pressure for dispensing. It can be used for single application with single pressure.

SECONDARY REGULATORS

Secondary gas regulator minimize the pressure from primary regulator or gas blender and distribute the lower pressure to each beer keg.

Reduce **BEER WASTE** and **INCREASE** Profit

Beer Foam Detector

Foam on Beer detectors – F.O.B. is a small device that results in big savings. FOB shuts off beer flow immediately after the keg goes empty but keeps the beer line full of beer. So when you tap in a new keg, no beer is wasted as foam at all.
